ANNUAL REPORT INSTRUCTIONS FOR SOLVENT FACILITIES

1. **MATERIAL:** List all materials used by **type** for solvents (i.e., isopropyl alcohol (IPA), methyl ethyl ketone (MEK), acetone, etc.) and any paints that were used by **brand name, stock ID, and type** in this column from your monthly records. It is not necessary to group by type of material, but please list all materials used. If you need extra space, you may either make extra copies or write the information on a separate sheet.
2. **TOTAL USAGE:** In the columns to the right of the material categories, please list the total amount of material used, recycled, and the maximum lbs/gallon of ROCs that the material has. To convert grams/liter to lbs/gallon, calculate as follows:

$$\frac{\text{grams/liter}}{120} = \text{lbs/gallon}$$

3. **TOTAL RECYCLED:** This is the amount of material sent off site, either by hazardous waste hauler, sent to a recycling center, or sent back to the manufacturer. If you are recycling by some other method, please attach explanation.
4. **NET USAGE:** The **total usage** minus the **total recycled** equals the **net usage**.
5. **ROC (Reactive Organic Compound) LBS/GAL:** Consult your supplier for assistance if unable to determine the ROC limit of your material
6. **EMISSIONS LBS/YEAR:** Multiply the **net usage** with the **ROC* lbs/gal** to get the **emissions lbs/year**.

Example:

MATERIAL	TOTAL USAGE (GALS)	TOTAL RECYCLED (GALS)	NET USAGE (GALS)	ROC* LBS/GAL	EMISSIONS LBS/YEAR
IPA	24.0	0.0	24.0	6.83	164
MEK	8.5	2.0	6.5	6.73	44
TOLUENE	13.0	2.0	11.0	7.22	79
TOTAL	N/A	N/A	N/A	N/A	287
